Per City of Rehoboth Beach Code **§ 270-84. Building permits:** *"No person shall commence work for the erection or alteration of any building or structure until a building permit has been duly issued therefor."* All construction in the City of Rehoboth Beach, whether new, remodeling or additions, requires a City of Rehoboth building permit be approved and issued before work begins. Contact this office should you have any questions concerning whether a building permit is required.

Application for building permit must have a separate contract/proposal attached with scope of work including adequate detail to describe project in full, including total cost of job, with all labor and materials. The contract/proposal must be generated by the contractor who is to perform the work. If the homeowner is acting as contractor, they may create the contract/proposal.

**For HVAC work with exterior units, in addition to the contract/proposal attachment, the contractor must submit photos or a drawing which shows the location of the exterior unit(s) on the site in relation to setbacks.** Designate on permit application whether this is a new or existing site placement.

**All subcontractors used by either the general contractor or the homeowner must obtain a City Of Rehoboth Beach Business License before beginning work.** No work shall begin before the building permit is issued, paid, and the permit placard is posted on the jobsite. Inspections are required for work, please contact this office regarding which inspections are required for your project.
